Breeding Solanaceae Fruit:
EGGPLANT, PEPPER AND TOMATO

CLARA PONS

Clara Pons is a post-doc at the Instituto de Conservación y Mejora de la Agrodiversidad Valenciana (COMAV/UPV). Her major subject of research has always been fruit development, ripening and quality and Their interaction with environmental stresses. She has applied transcriptomics, proteomics, genomics and integrated data analysis to understand and unravel the molecular and genetic basis controlling fruit traits, their natural variation and how changes in environmental conditions, before and following harvest, affect the expression of these traits"
