Breeding Solanaceae Fruit:  
EGGPLANT, PEPPER AND TOMATO

### ***ILAN PARAN***

Dr. Paran is a senior researcher at the Plant Sciences Institute, The Volcani center, Israel. The main focus of Dr. Paran activity is pepper genetics and breeding. The major research interests are the development of molecular tools for pepper improvement, characterization and utilization of natural and induced variation of *Capsicum*, molecular mapping of fruit yield and quality traits and development of breeding lines containing disease resistance and fruit quality traits.
