Breeding Solanaceae Fruit:
EGGPLANT, PEPPER AND TOMATO

ROGER T. CHETELAT

Dr. Chetelat oversees the C.M. Rick Tomato Genetics Resource Center, a national and international gene bank of tomato mutants, wild relatives, and other genetic stocks. Seed is used by researchers, breeders and educators to facilitate a wide range of studies on tomato. Chetelat's current research focuses on the molecular mechanisms of interspecific incompatibility and on pollen and seed responses to heat stress.
